Limetree Bay Refining Recognized for 2019 Safety Performance

St. Croix, U.S. Virgin Islands (October 16, 2020) – Limetree Bay Refining, LLC, (Limetree) is pleased to announce that the company is being recognized for its excellent safety performance in 2019. During a virtual ceremony this month, Limetree will be honored with a Safety Achievement Award from American Fuel and Petrochemical Manufacturers (AFPM).

The AFPM Safety awards honor refineries, petrochemical facilities and contractors who meet the stringent requirements set by AFPM's Safety and Health committee. Limetree was included in the esteemed list of 24 companies selected for this honor, and Vice President of Health, Safety and Environment for Limetree, Ryan Biggs, expressed his appreciation for the workforce's commitment to safety. "Limetree is unwavering in its commitment to safety, and I am proud of our team for being recognized by AFPM for outstanding safety performance at the St. Croix refinery," remarked Ryan Biggs. "Safety is a core value of the Company and is integral to everything we do," added Biggs.

"Limetree is committed to zero injuries and incidents and believe that all can be prevented," stated Biggs. "Congratulations are in order to our entire team, as we work to continuously strive for incident free operation," concluded Biggs.

The virtual ceremony will be held on October 21, 2020, where Limetree's management will be presented with the award from the AFPM committee. Additional information about the awards can be found at <https://www.afpm.org/safety-programs/safety-awards-recognition/afpm-safety-awards>

###

About Limetree Bay Refining

Limetree Bay Refining, LLC, will be capable of processing around 200,000 barrels per day when it restarts in 2020. Key maintenance work at the site began in 2018. The refinery includes a 62,000 barrels per day modern, delayed coker unit, extensive desulfurization capacity, and a reformer unit to produce clean, low-sulfur transportation fuels that will meet International Marine Organization ("IMO") standards required under international law in 2020. The project is providing needed economic development in the USVI, creating more than 4,000 construction jobs at its peak and more than 600 full-time jobs in the long term.
